

Evolution of Software Infrastructure to Support
Science and the Communications Arts

M. Jason Vandecreek

WSU – Special Projects
Research Associate

HireMJ@Vandecreek.com

Vandecreek Consulting

custom software solutions, architecture, training, design, data science

10+ years as both a contractor and hourly employee of WSU

CEI Community Engagement Institute

Primarily with the CARE team (Center for Applied Research and Evaluation)

CETARL The Center for Educational Technologies to Assist Refugee Learners

one of four winning research projects of the Convergence Sciences Initiative grant funding

Trees for Life, International – Volunteer / Board Member

Poverty reduction, education, nutrition, eye-care

The Arts
Fuel Our Souls

The Data Analysis Ecosystem

Fueled by the Open Source Software Movement

Origins: Where did these tools come from?

Who makes this stuff and how is it funded?

And why is that important?

Software As A Key Piece Of Infrastructure In An Ecosystem

One example: SQLite

- An embedded database everyone in this room has used.
- Most Widely Deployed Database and Public Domain
- Used in the flight software for the Airbus A350 XWB aircraft.
- Created by Dr. Richard Hipp in 2000.
- Android, iPhone, Windows, Macintosh, TVs, Firefox, Chrome, and Safari, and billions more.

HDF – Example

Hierarchical Data Format version 5 (HDF5)

HDF5 is a data model, library, and file format for storing and managing data.

When: 1988

Who: [National Center for Supercomputing Applications](#) (NCSA) at the University of Illinois at Urbana-Champaign

Why: Scientific Data Sets, Meta, Graphics, Subsets, etc.

Also created MOSAIC, the first graphical web browser.

HDF files or HTML files

Funding: NSF National Science Foundation

“Make software useable outside of the lab in which it was created”

Software Capitalization Project

Benefits / Outcomes

Massachusetts General Hospital (Hospital in Boston)

1990s chose HDF to store both X-ray images and patient data in a single file

Private companies started to donate money to the HDF project (Phillips 66)

Big Data – NASA: Earth Sciences – Earth Observing System

Produces 3 Terabytes of data per day!

Boeing flight testing: Database can't scale

Hybrid solutions – Put metadata in a database and then reference millions of HDF files in storage

rOpenSci ropensci.org

fosters a culture that values **open** and **reproducible** research using **shared** data and reusable software

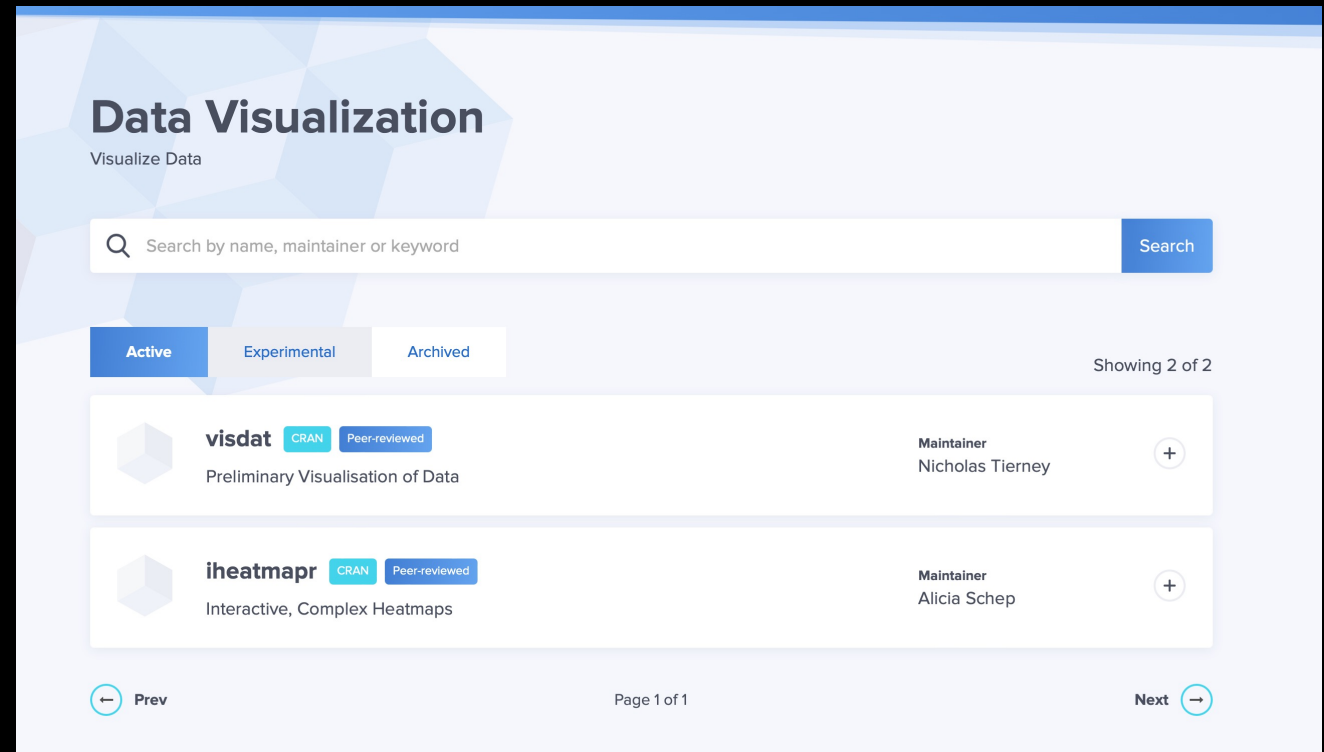

Promoting **Software Peer Review**

packages contributed by the community undergo a transparent, constructive, non adversarial and open review process

NumFOCUS is a nonprofit that supports and promotes world-class, innovative, open source scientific computing, including rOpenSci.

[Journal of Open Source Education](#)

Trend:
A dramatic
increase in
access to an
open research
and analysis
ecosystem

Jupyter Notebooks

Purpose: To support interactive data science and scientific computing across all programming languages.

Funding: Healthy mix of private business, foundation grants, and governments.

Project Jupyter is a nonprofit organization

Advantages of our toolset

- Python and R Languages
- Data cleaning and wrangling (organizing)
- Data analysis (statistics, calculations, etc.)
- Data visualization and export
- Reproducibility

SPSS and MATLAB

- high \$ costs
- language more cryptic
- point and click; error prone; not aware of what it is doing

Clear

Early Childhood Development 0-5 years old

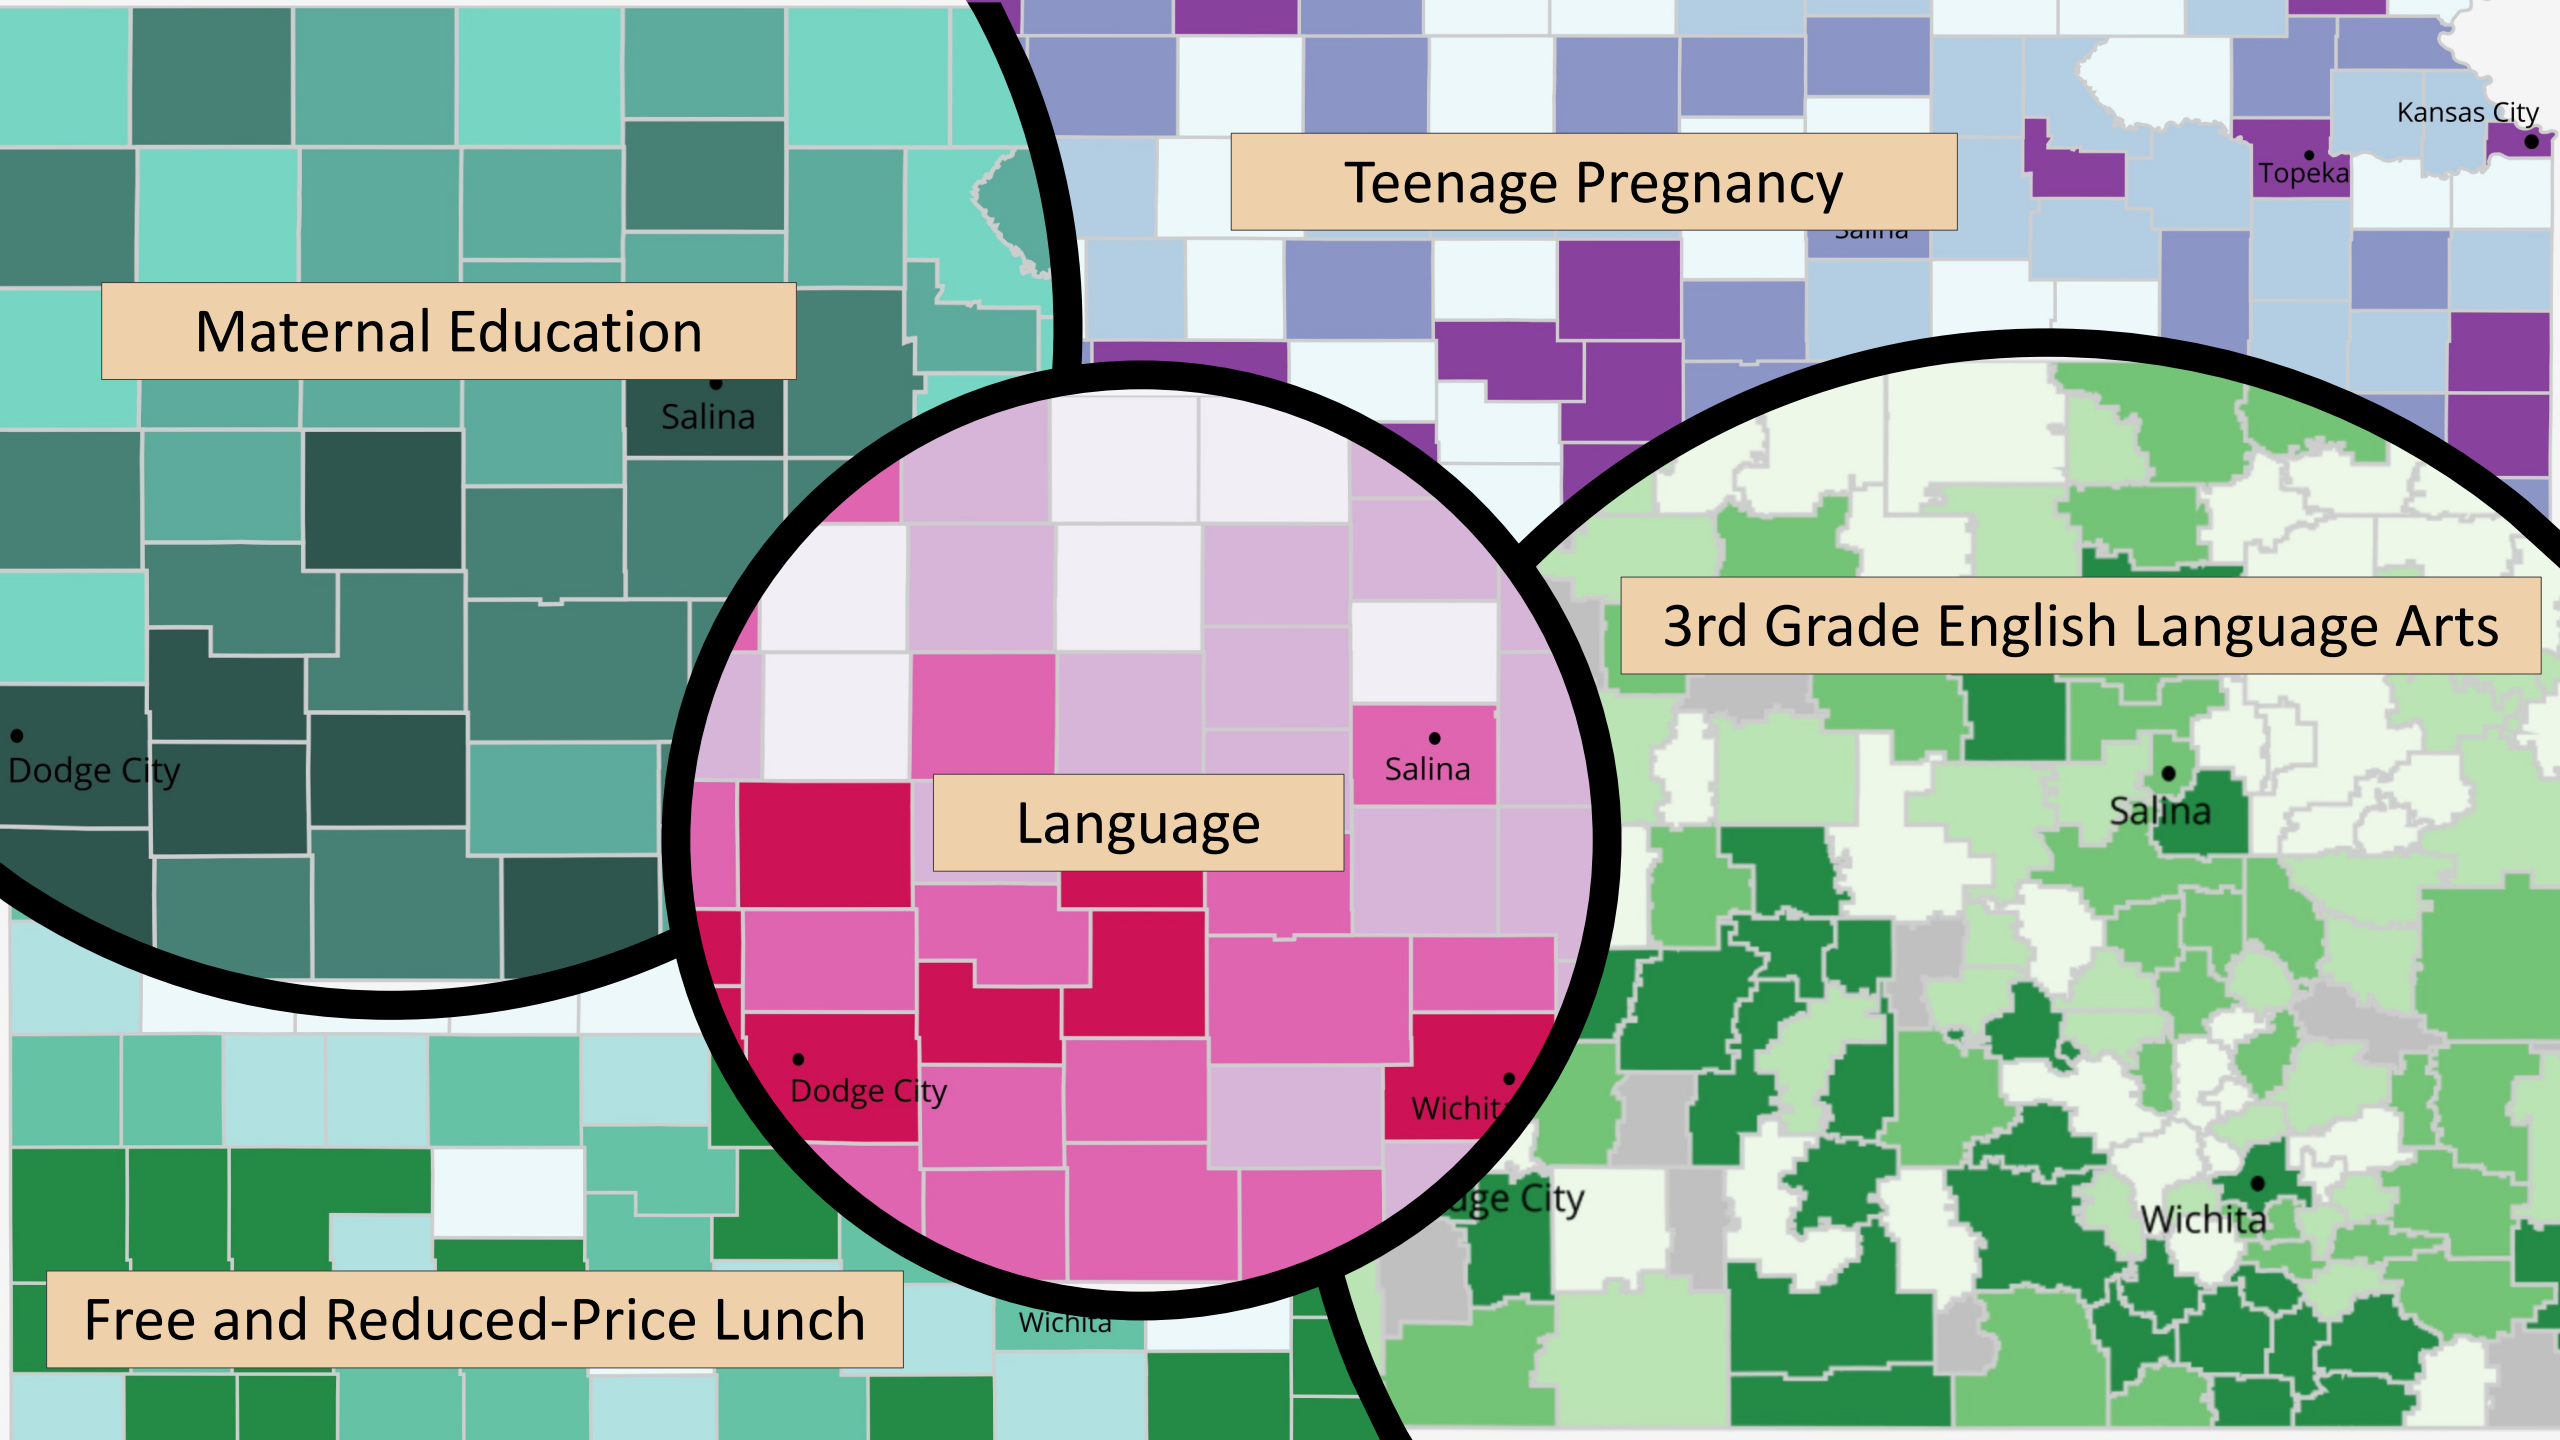

Center for Applied Research and
Evaluation (CARE) @ CEI / WSU

We evaluate data they have collected for us.

We give them information about what kind of
impact are they having on the children and families
they serve.

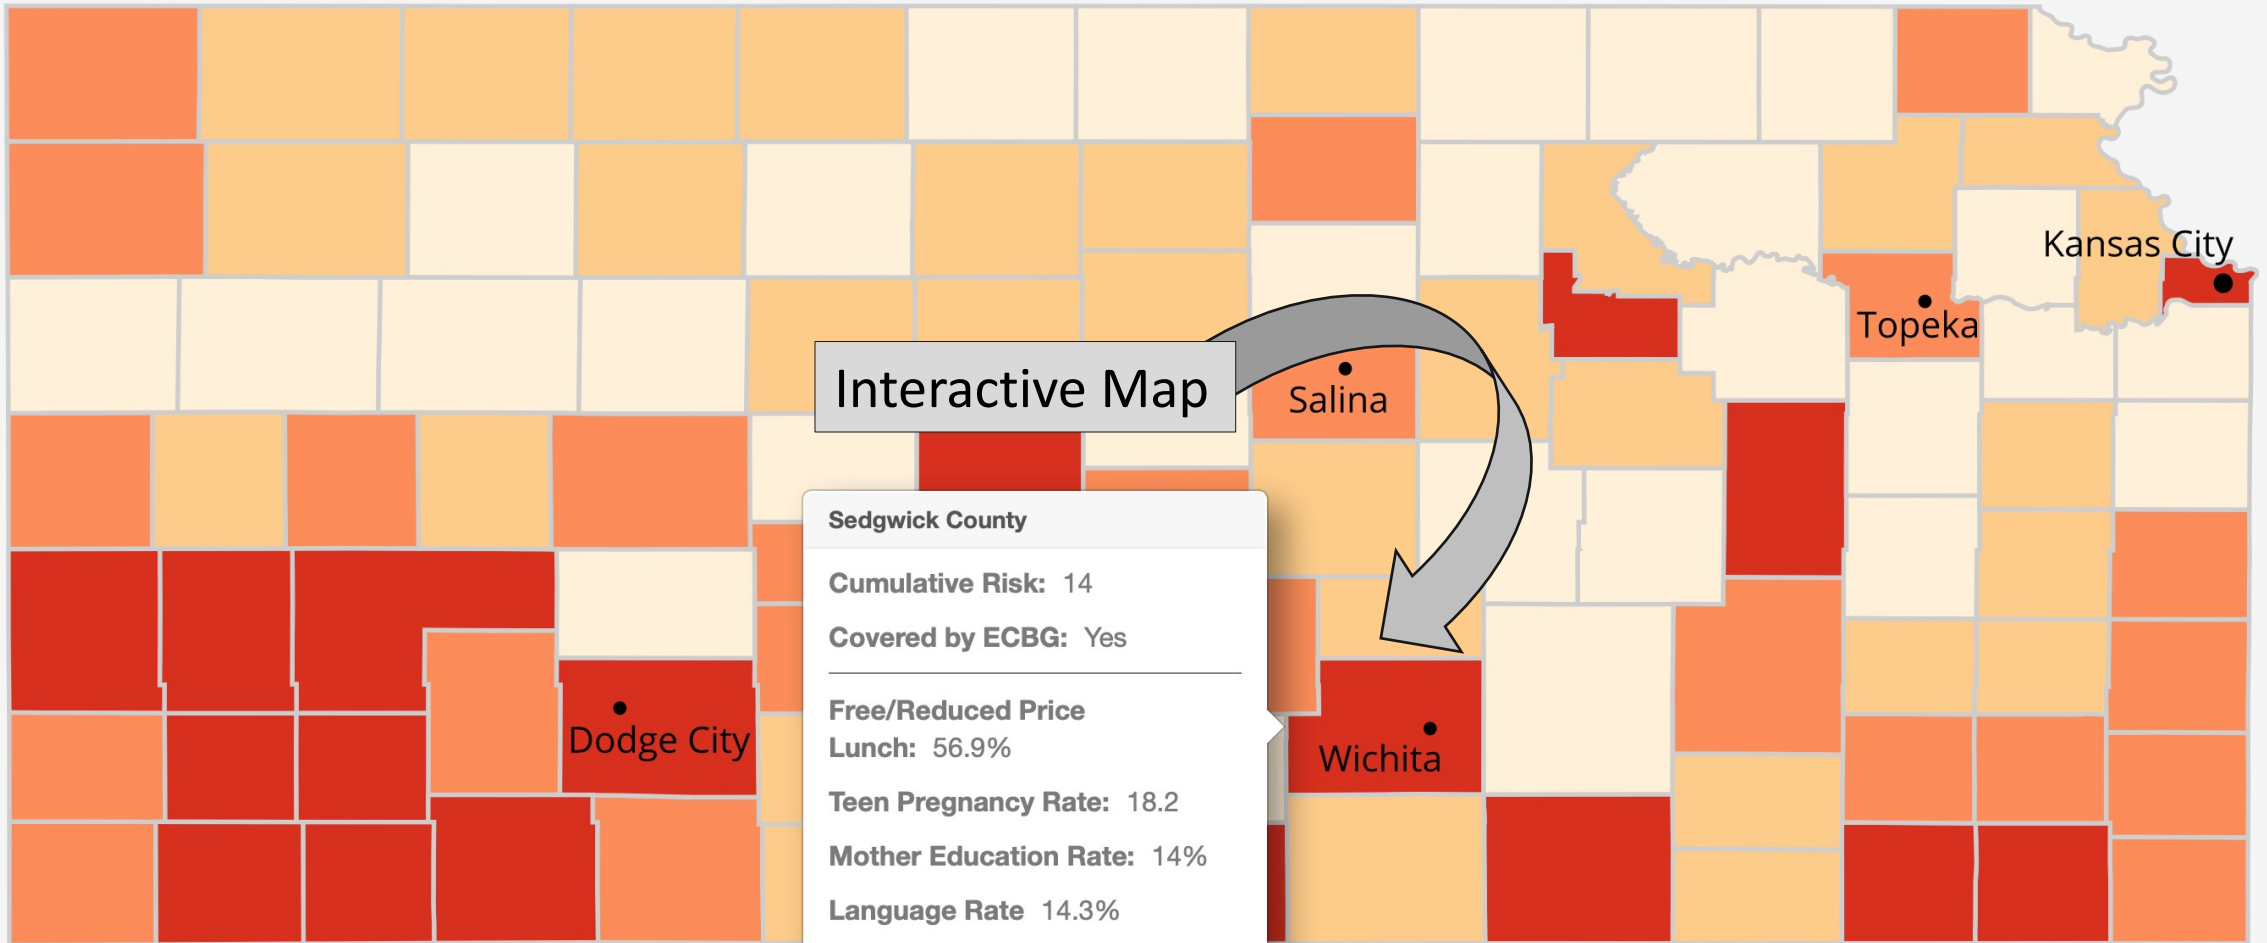

Cumulative Risk Score

4 - 7

8 - 10

11 - 13

14 - 16

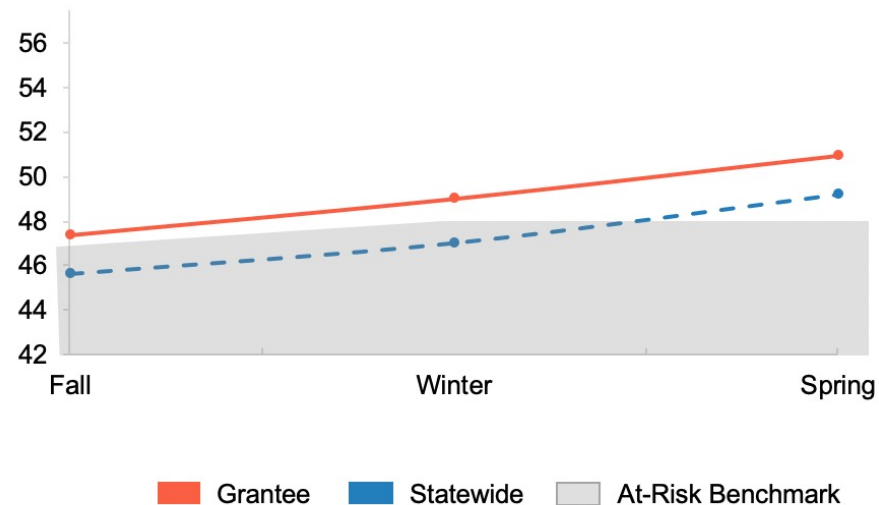

Challenge is to produce
reports for various
audiences

We don't produce one
report – we design at least 3
levels of presentation

Literacy Average Change Over Time

The graphs below display the average change over time in each subtest. They also show how the Grantee scores compare to scores statewide. The Grantee's average scores were **above statewide averages** in the spring for all subtests. This Grantee made the largest gains of all the ECBG grantees in the **Picture Naming** and **Alliteration** subtests.

Language Comprehension

Language

Maternal speech abilities and exposure to reading ...

[READ MORE](#)

Parent Education

Low maternal education has been found ...

[READ MORE](#)

Cognitive Impacts

As a predictor of child IQ, income/poverty is more influential than even maternal education.²⁸

Income has been found to be the single highest correlate of academic achievement.²⁵

Results

Improving Outcomes

Individual Early Childhood sites (programs) are seeing the **value of data** and are **using it** to improve school readiness levels in children across Kansas
